

SmartGene is an Application Service Provider (SaaS) which develops and markets cutting-edge, web-based, data-management solutions in the field of genetics. Our Apps are oriented towards medical research and diagnostics, and in use by our customers worldwide (see www.smartgene.com).

To reinforce its team in Lausanne, Switzerland, **SmartGene** is seeking a
Senior Informatician and Project Manager.

Our ideal candidate would have a bachelor's or master's degree in computer science and be fluent in English. French and German language skills would be an asset.

The ideal candidate should have the following competences:

- Management of projects with an in-house team and outside programmers
- Knowledge in current Linux systems and programming languages, as well as in Java
- Experience with PostgreSQL and with complex application systems
- Knowledge in using project management tools such as Jira
- Ability to perform code evaluation and migration into new framework
- Familiarity with software quality control and documentation
- Interest in biology and science in general

You will join a strongly motivated team providing advanced software services in the rapidly evolving field of genetic medicine. Our customers are university hospitals, diagnostic labs, and research networks around the world.

If you have the skills and drive we seek, then we will invest in you, helping you to develop the domain knowledge you need to thrive in this fascinating world where computer programming meets DNA.

Please note: for this position you must possess a valid Swiss work permit if you're not a Swiss national.

Please address your resume in English with a cover letter and other relevant documentation to our HR contact:
